

Your success is our business

This Women's Month, we want to take the opportunity to celebrate every role that women fulfil in bridging the economic divide. Currently, 31% of our investment portfolio comprises businesses owned and managed by Black women entrepreneurs, while 39% of Asonge shares are held by women investors. So look to us for funding for start-up, expansion and equity acquisition purposes, as well as business planning support and partnerships to make your entrepreneurial dreams come true. Call us and speak to the people who believe in the economic empowerment of women!
